

Case Study

Southmoor Community School

Sunderland

Tom Bowman is Head of Science at Southmoor Community School in Sunderland. The teachers in his department use Boardworks resources on their classroom projectors on a regular basis throughout their KS3 and KS4 teaching.

Tom feels that having Boardworks really helps when planning lessons. “It saves me a lot of work,” he says. “I particularly like the animations. Some of them have difficult concepts to get across to kids and having them just makes it a million times easier. We spent the first year putting everything together for ourselves – it was a lot of hard work. So when we saw that Boardworks had come out we grabbed that as soon as we could!”

Tom concludes, “I just think it’s fantastic, and I wish we’d got it years ago!”
