

MyWorks Key Stage 3 Science *Review*

MyWorks KS3 Science should be in every Science teacher's toolkit. It offers a comprehensive and versatile package at excellent value for departments on a tight budget. It engages students across all levels of ability and allows teachers to provide instant feedback on understanding and progress. Teachers can easily populate their classes straight from a school database, adding or deleting students as the need arises. Individual students can be set a superb variety of differentiated tasks across all KS3 topics. Activities can be accessed either in lessons or later at home. Navigation throughout is clear and simple so training requirements are minimal. Keyword searches and filtering allows the user to find classes and set assignments easily. MyWorks provide full back up and support and help is never far away for teachers and students alike. MyWorks KS3 Science suits all forms of presentation media from interactive whiteboards to handheld devices. This ticks lots of boxes for raising student achievement, from depth of subject knowledge, through challenge and stimulus to clearly evident pedagogy.
