

Connah's Quay High School

Deeside, Flintshire

Gemma Harris teaches Maths at Connah's Quay High School in Deeside. All the teachers in her department incorporate Boardworks KS3+KS4 Maths resources into their teaching on a regular basis.

Gemma's students love Boardworks – as the resources are packed full of engaging interactive activities and games, there are plenty of opportunities for them to come up to the whiteboard and explore mathematical concepts in a really hands-on way. But what she really likes about them is their flexibility: "I think the PowerPoint format is really good. It gives me the freedom to adapt it or cut out slides I don't want and save presentations separately so it's all there how I want to use it. Or if there's something I'm not too sure of, I can look on Boardworks to see how it tackles the topic, and if I like the way they've done it, I can just run through the presentation as it is."

Gemma and her department find Boardworks resources so useful that they are drawing heavily on the material to create their Schemes of Work. Whether using the resources for starters or plenaries, or to introduce a topic, maths teachers at Connah's Quay High School trust Boardworks to deliver reliable material, matched to the curriculum, which engages their students.
