

The multi-store model of memory

Can you remember all the components of Atkinson & Shiffrin's 1968 multi-store model of memory?

Fill in the gaps on the diagram below.

Hint: the blue boxes represent the different memory stores, the blue arrows processes of movement between the memory stores, and the pink arrows gain or loss of information.

**short-term
memory
(STM)**

**maintenance
rehearsal**

**information lost
through decay
or displacement**

**long-term
memory
(LTM)**

**information lost
through decay
or interference**

rehearsal

**sensory
memory
(SM)**

attention

**information lost
through decay**
